About

I am a young, curious and communicative individual. Previously, I worked as a developer, now I am a freelancer, focused on blockchain, Web3 and smart-contracts. I love engaging in new adventures, meeting new people and learning new things. I value clarity and attention to detail in my work and activities, making disorder and chaos my biggest enemies.

Work Experience

SOFTEC Hybrid

Aug 2022 - Jul 2024

Junior Developer

I was actively involved in the development of fintech and banking applications. My role encompassed not only the technical aspects of development but also the analysis of customer requests to ensure that solutions were both effective and aligned with business objectives. I was responsible for designing and architecting solutions that met customer requirements and I played a critical role in implementing these requirements into functional, high-quality applications. I also provided production support, troubleshooting and resolving issues to ensure smooth operation of the deployed applications. Technologies: Java, Spring Boot, Docker, OpenShift, GitLab CI/CD.

Slovak University of Technology Onsite

Sep 2023 - May 2024

Teacher

I worked as a trainer on courses focused on object-oriented programming, primarily in the Java language. Technologies: Java, OOP.

National Bank of Slovakia Hybrid

Feb 2023 - Jun 2023

Communication Strategy Consultant

As a team, we collaborated on identifying key financial topics related to personal finances and the National Bank of Slovakia, with a specific focus on effectively communicating them to young people aged 15-25. Through our collective efforts, we developed a comprehensive understanding of the financial challenges faced by this demographic and crafted targeted communication ideas to engage and educate them on important financial concepts.

Fumbi Remote

May 2022 - Feb 2023

Blockchain Developer Internship

As a team, we worked on the research and development of a product using multiple DeFi protocols on the Ethereum network. Technologies: VueJS, Solidity, DeFi, Metamask, Ethereum.

KPMG in Slovakia Onsite

Jul 2021 - Jul 2022

Information Technology Trainee

Helped and supported senior colleagues within the IT department.

Education

nexteria.sk Onsite

Jul 2022 - Present

3-year leadership programme in Slovakia, cultivating exceptional leaders through practical skills, strong relationships, and ethical values. Provides a dynamic learning environment for immediate real-world application and a diverse network of peers, mentors, and experts for collaboration and continuous learning.

Faculty of Informatics and Information Technologies, STU Onsite

Sep 2023 - Present

Master's degree in Computer Software Engineering

Faculty of Informatics and Information Technologies, STU Onsite

Volunteering

Ynet Hybrid

Jul 2021 - Present

Engineer

Ynet is a civic association operating in five dormitories of the Slovak University of Technology. Its goal is to build, enhance, and maintain the academic network in the dormitories. As a member of the implementation team, I engage in various activities such as website administration, support, system administration, coding, and other tasks including repairs, management, and public relations.

Climathon Bratislava Hybrid

Sep 2023 - Nov 2023

Organizational Consultant

Climathon Bratislava is the most significant innovative event that brings together experienced mentors, experts from practice, technical or business leaders, and enthusiasts from all over Slovakia to address climate change in our region.
